Election/Restrictions

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 24-26 are, drawn to a method for growing crystals reacting potassium bitartrate with calcium chloride in a gel, classified in class 117, subclass 2+.
 - II. Claims 17-23 and 27-30 are, drawn to a kit for growing crystals, classified in class 423, subclass 328.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be practiced by another and materially different process, such as, growing GaAs, InP crystals

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for-examination purposes as indicated is proper.

Art Unit: 1765

4. A telephone call was made to Eric J Hanson on 04/28/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
